Civil Ground –Work

Skilled Engineers have established a proven track record in groundwork and major civil engineering projects, ranging from turnkey construction projects to social and private housing developments. We constantly find ourselves in leading roles as the primary contractor or sub-contractor.

Our scope of work embraces every aspect of the construction cycle from the initial site survey to liaising with the Project Engineer on:

- Land maximization
- Re-profiling the earthworks to required design levels
- Drainage and roads
- Bridges
- Foundations and buildings
- Ground floor slab
- Surfacing finishing touches

We have earned a strong reputation as a quality provider, solving complex problems. Moreover, we successfully deliver projects on either a stand-alone basis or as part of a consortium, offering a larger package to major contractors, local authorities, and consulting engineers.
